

Winter 2024 COMP 3005 Project
Student Names: Jackson Scott
Due: 13/04/12

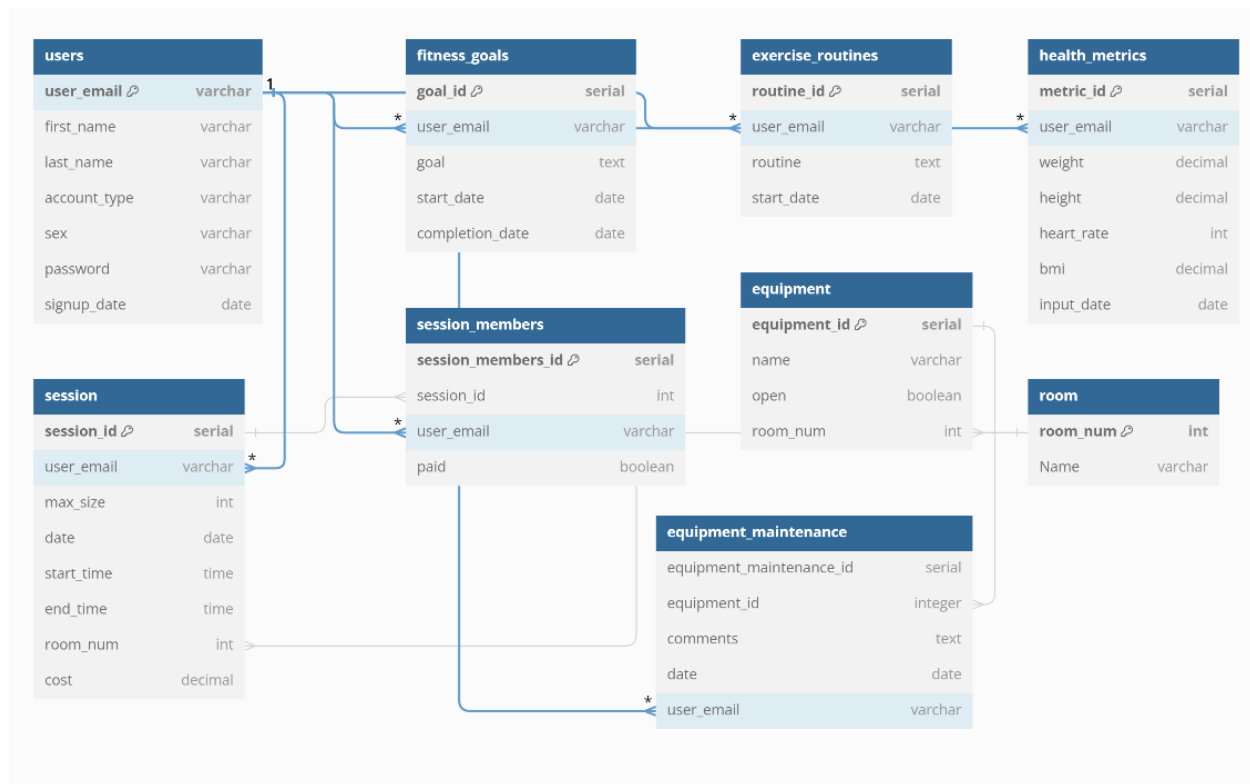

Part 1: Conceptual Design

Website only allowed for 60 items per diagram so I had to make multiple, first image show relation between classes, and the next 3 show the attribute for the classes.

Part 2: Reduction to Relation Schemas

Part 3: DDL File

Included in the file *"CreateTables.sql"*

Part 3: DML File

Included in the file *"LoadTables.sql"*

Dependent on sequence based ID from equipment and session so equipment_maintenance and session members tables aren't preloaded

Part 4: Implementation

Broke function up into groups

Part 5: Bonus Features

Included in the file *"UML_Requirement_Traceability_Matrix__team50.pdf"*
